

DYNAenergetics is a group member of DYNAMIC MATERIALS CORPORATION. We are the world leaders when it comes to industrial explosives technologies. In the business unit DYNAWELL we produce and market perforating systems for the oil and gas industry.

We continue to grow steadily. For this reason, we are looking for the business unit DYNAWELL at our location Troisdorf near Cologne, Germany highly qualified staff.

Construction Engineer for Equipment Design (f/m)

- **Your Challenge:** You are responsible for the planning, design, construction and procurement of equipment such as presses, dosages of explosives manufacturing and facilities for the protection of our operations. Also product approvals and patents belong to your daily responsibilities.
- **Your Profile:** You are a graduate in Engineering or posses a similar technical training and have gained valuable work experience and profound know-how in construction and material science. You have excellent knowledge of 3D CAD (Autodesk Inventor) and 2D-CAD (AutoCAD, CCD). In addition MS office is substantial. You are fluent in German and good in English and have strong analytical skills. As an independent team player you show excellent communication skills. Finally you are willing to travel worldwide.
- **Our Offer:** DYNAenergetics offers you employment conditions in a pleasant ambience, with plenty of scope for your own ideas along with the opportunity to take on responsibility in a company operating in a global market. The professional and personal development of our employees is one of our top priorities. An attractive remuneration and appealing social benefits are an important part of this.
- **Your Application:** Please send your full application including details of your desired salary and possible starting date to:
