Mr. Ihab Ismail was born on 14th December 1971, his nationality is Egyptian.

He is a versatile and skilled professional with leadership qualities and excellent hands-on experience in developing and improving sales and operations. Mr. Ismael has formulated the market strategies and participated in managing the change of growing businesses and setting up operations in new countries in the Middle East & North Africa region.

He has gathered extensive wireline logging experience in both Off-Shore and Land in the U.A.E., Saudi Arabia, Algeria and the USA with major international service companies; he is familiar with all related operations to well logging in both cased and open hole. Mr. Ismael knows all logging systems including horizontal well technologies such as PCL & CTL, and tractor operations. Also he has extensive experience with TCP operations, as well as wireline operations in high pressure sour gas producing wells.

His experience includes corrosion logging, pipe recovery, completion recovery, cement evaluation, image logging, and production logging in rig, rigless, and remote operations.
